

## **Prilagoditve študijskega režima pri izbirnem predmetu Klična elektrokardiografija v 5. letniku magistrskega študija medicine z ozirom na epidemijo COVID-19 in ukrepe za omejevanje epidemije**

### **Učna delavnica**

Klična elektrokardiografija poteka v obliki učnih delavnic. Ker zaradi varnostnih ukrepov v času epidemije COVID-19 učnih delavnic ni možno izvajati v predavalnicah, bodo izvedene s spletno konferenco.

### **Izpit**

Pisni izpit bo predvidoma organiziran v majhnih skupinah po 6 študentov, ki bodo uporabljali enako zaščitno opremo in ukrepe kot pri kliničnih vajah. Vsebina in način opravljanja izpita za študente ostaneta enaka.

## **Modifications of the study regime for the elective course Clinical electrocardiography with regard to the COVID-19 epidemic**

### **Workshops**

The teaching of Clinical electrocardiography takes the form of workshops. As safety measures preclude workshops in lecture halls during the COVID-19 epidemic, they will be conducted via a web conference.

### **Exam**

We expect to organise the written exam in small groups of 6 students, who will use the same protective measures as during clinical practice. The content and form of the exam does not change for the students.
